

*You are invited to participate in ...
Pilot International's Award-Winning Childrens'
Program for Pre-School to Third Grade*

**BrainMinder
Buddies!™**

Provided by your local Pilot Club

- Every year, **more than one million children** sustain brain injuries.
- Bicycle accidents cause an average of **130,000 brain injuries** to children.
- Annually, **30,000 children** sustain permanent brain disabilities from injuries.

BrainMinders™ is a educational program developed by Pilot International to create public awareness... prevention is the only cure for brain injuries. Every fifteen seconds, someone in the USA incurs a brain injury. Brain trauma is now the leading cause of death among children and teen-agers in the United States. This childrens' program is designed to teach a child how to prevent brain injuries and to protect their brain.

BrainMinder Buddies™ is flexible, and easy to facilitate.

Here's how...

BrainMinder Buddies™ can be delivered by a Pilot or Anchor volunteer.

The first-year program involves:

- An illustrated flip chart story with interactive questions
- An activity/coloring book for each child with information for parents
- Individual BrainMinder Buddies™ Certificates for the participating children..

The second-year program is more flexible for presentation

- A script for a skit for presentation by puppets or costumes

presented by the Pilot Club members

- An activity/coloring book is presented to each child
- Individual Certificates are also available for each child

Teachers are requested to specify available time and activities for the classroom.

The BrainMinder Buddies™ program brings valuable benefits for your children and your community.

BrainMinder Buddies™ programs are offered in every Pilot International Community through a grant from Pilot International Foundation. Founded in 1921, Pilot International is a service organization of business and professional individuals. Today, Pilot and Anchor clubs have over 25,000 members in six countries. This signature project is a result of a ten-year Pilot International Foundation program focusing on brain-related disabilities and disorders. Over 500,000 books distributed.

“The only cure for brain injury is prevention.”
