Approximately 40% of all bicycle-related deaths are due to head injuries; ¾ of all bicycle-related head injuries occur among children ages 14 and under; and many children are simply unable to protect their heads while bike riding because they don’t have access to quality, affordable safety helmets. This international signature project allows Pilots, “The Helmet People,” to place safety helmets on the heads of as many youth as possible.

Because of this grant, members of the Pilot Club of _____ were able to visit children at _____ in _____ CITY _____ during “Brain Awareness Week” which is declared as March _____ by the Brain Alliance Association. Pilots presented a BrainMinders™ puppet show to teach the children how to protect their brain for life. _____ helmets were presented to children and Pilots assisted with proper fitting of the helmets for each child.
